PROFILE

I am fascinated by ideas, and I am passionate about bringing my ideas to life through coding. As a developer with a background in customer service, I am very deliberate in my approach to identifying challenges, finding the right solutions, and creating great user experiences. Leveraging emerging technologies to build valuable tools and to make critical decisions that will lead to the production of justice is very important to me. I am looking to join a collaborative and inclusive team that is focused on innovation, growth, and continuous learning.

WORK EXPERIENCE

Front End Developer, Freelance

June 2020 – Present

- Designing and developing interactive websites and creating UX/UI strategies for small businesses that resulted in increased online presence and engagement.

Retail Specialist, North (acquired by Google, June 2020)

May 2018 – February 2019

- Collaborated with software engineers, product managers, user researchers, UX designers, and retail managers to develop customer experience solutions across all touchpoints, which led to the successful delivery of North's Focals AR prescription smart glasses to retail locations in Toronto and Brooklyn, NY.

Showroom Lead (Key Holder), Kit and Ace

August 2015 – May 2018

- Managed product and inventory processes and boosted the efficiency of back of house operations for two locations in Toronto.
- Coached, mentored, and developed sales associates on guest experience and all store tasks and processes.

Supply Chain Coordinator, Martin-Brower of Canada

January 2007 – April 2015

- Supported supply chain planners in the timely execution of supply chain strategies for McDonald's Canada's marketing and menu initiatives.
- Providing remote support and logistics coordination for the McDonald's Canada's marketing team, and coordinated all requests for products required for photo shoots, commercials, product research, RFQ proposals, and training initiatives.

FEATURED PROJECTS

My Booklist App

REACT | FIREBASE | SASS | GOOGLE BOOKS API

A book list app that allows users to search for books that they want to read. Users can then add or remove books from their book list.

Bite Sized Restaurant Finder App

REACT | FIREBASE | ZOMATO API

A restaurant finder app that allows users to search for restaurants in North American cities and create lists of restaurants to try in that city.

Fit Bite App

HTML | CSS | JAVASCRIPT | JQUERY | EDEMAM API

A health and nutrition app that calculates your daily caloric requirements based on your body chemistry and weight goals and provides you with recipe suggestions that will help you stay within those requirements.
